PATTI PICS VALIDATED CHILDREN'S SYMBOLS

The Patti Pics optotype test has been designed to meet acuity test standardization criteria. They adhere to the Snellen principle and are calibrated to provide the same acuities as Sloan letters. Patti Pics are made up of five well-known symbols modified to provide a universal pediatric chart.

AUTOLINK ADVANCED TESTING & INTEGRATION

INNOVA ProVideo® goes well beyond visual acuity to improve your practice – with advanced testing, exam room integration and superior optotypes. All of which translates into improved quality of care and efficiency in your practice.

DISTANCE STEREO ADVANCED VISION TESTING

ProVideo STEREO® allows you to test stereopsis, establish accurate threshold and accurately monitor the patient's progress, making it useful for sports vision as well as pediatric and adult exams. ProVideo STEREO® provides excellent isolation using red green glasses. Stereo images include random dot, forced choice tests, and an animated butterfly.

ProVideo CLASSIC INTEGRATED VISION TESTING
